RESTRICTION REQUIREMENT

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

In response to the Restriction Requirement dated November 22, 2004, Applicants provisionally elect with traverse Group I, Claims 1-15 and 26-28 directed to an apparatus for examination on the merits in the present application. Applicants make this election based on the understanding that Applicants are not prejudiced against filing one or more divisional applications that cover the non-elected claims.

Applicants traverse because, according to MPEP § 803:

If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits, even though it includes claims to distinct or independent inventions.

Although the Office Action has identified separate classifications, making a *prima facie* case of a serious burden, it is respectfully submitted that there is no serious burden in searching and examining the entire application.

As patents and other publications in this art often contain descriptions of both a process and the apparatus implementing the process, information as to both process and apparatus can be found in the same publication. It is thus very likely that patents and publications in the field of the claimed process will have descriptions of the apparatus in which the process is implemented, greatly facilitating the prior art search and the consideration of both apparatus and process claims.

Accordingly, Applicants respectfully traverse the Restriction Requirement on the grounds that a search and examination of the entire application would not place a *serious* burden on the Examiner, whereas it would be a serious burden on Applicants to prosecute and maintain separate applications on the restricted inventions.

Therefore, it is respectfully requested that the requirement to elect a single group be withdrawn, and that a full examination on the merits of Claims 1-36 be conducted.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
